

H. E. Mr António Guterres
Secretary-General of the United Nations

April 11, 2022

*"Fear and hope are the two tools with which people are governed.
Jean-Jacques Rousseau"*

Dear Mr. Secretary-General!

The Humanist Outlook Group (HOG) predicts. If:

- a) Representatives of Member States of the World Health Organization (WHO) re-elect Mr. Tedros Adhanom as Director-General to 2022-2027.
- b) The authority of the WHO Director-General to declare a pandemic when: "Event represents a significant public health risk even if no or very few human cases have yet been identified." would not be excluded from the International Health Regulations (IHR).
- c) Tedros Adhanom will not be prosecuted; namely, representatives of WHO member states will not turn to the International Court of Justice for an expert investigation to complete Mr. Tedros's conspiracy:
 - For the reason that the false alarm of the pandemic COVID-19; the false recommendation of the statistics on the infected and dead; the endless propaganda of the fear of a new wave have weakened the immunity of the world population, with the result in millions of citizens have become ill and died
 - For the introduction of new taxes through fear-mongering
 - For violating Article 3 of the Nuremberg Code. Particularly for allowing the experiment of COVID-19 vaccines instead of animals on people

This will inevitably worsen the WHO dictatorship, create a crisis in the UN, CoE, and EU, and, consequently, undermine the **sovereignty**, **security**, and **economic stability** of many G20 member countries.

Attached documents:

1. Analytical note
2. Copy of Humanistic Outlook Group's letter to WHO Director-General (January 7, 2022)
3. Copy of HOG's letter to Secretary-General of the United Nations (December 11, 2018)
4. Copy of HOG's letter to Secretary-General of the United Nations (April 5 2020)
5. Copy of HOG's letter to WHO Director-General (April 5, 2020)

Respectfully yours,

A. Tsereteli,
Director General of the Humanistic Outlook Group.

ANALYTICAL NOTE

Legal basis for the forecast:

- Activities of the Director-General of WHO, Mr. Tedros Adhanom 2017-2022.
- Activities of the Independent Panel established by the initiative of Mr. Tedros 2020-2021.
- Activities of the International Sanitary Conferences 1851-1938.
- Activities of the World Health Organization (WHO) 1948-2022
- Charter (Constitution) of the World Health Organization of June 22, 1946.
- Charter of the United Nations (UN) of June 26, 1945.
- International Health Regulations (2005) IHR Third edition 2016,
- Archived: WHO Timeline – COVID -19
- Listings of WHO's response to COVID-19 (*Last updated January 29, 2021*)
- Convention on the Privileges and Immunities of the Specialized Agencies of November 21, 1947, and annex VII

1. As we all know, the motivation for establishing the World Health Organisation (WHO) 75 years ago was an agreement to "the attainment by all peoples of the highest possible level of health." as set out in Article 1 of the WHO Constitution of June 22, 1946.

https://cdn.who.int/media/docs/default-source/documents/publications/basic-documents-constitution-of-who179f0d3d-a613-4760-8801-811dfce250af.pdf?sfvrsn=e8fb384f_1&download=true

2. But few people know that seventy years later, according to the International Health Regulations (IHR 2005), Third Edition 2016, the WHO's original purpose was formulated as follows: "A central and historic responsibility for the World Health Organization (WHO) has been the management of the global regime for the control of the international spread of disease. Under Articles 21(a) and 22, the Constitution of WHO confers upon the World Health Assembly the authority to adopt regulations "designed to prevent the international spread of disease," which, after adoption by the Health Assembly, enter into force for all WHO Member States that do not affirmatively opt-out of them within a specified time period." Source page.1.

<https://www.who.int/publications/i/item/9789241580496>

3. According to the IHR 2016: "Event represents a significant public health risk even if no or very few human cases have yet been identified." When no disease cases have been detected, the Director-General of WHO has the authority to declare a public health emergency. It creates an international concern (to block the movement of people and transport around the world, to block the economy), i.e., to provoke a crisis in UN, CoE, and EU activities. (source: IHR- 2005, Third Edition, Chapter: para.44

<https://www.who.int/publications/i/item/9789241580496>

4. Also, few can imagine that, under the Convention on the Privileges and Immunities of the Specialized Agencies, provided for in Article VI of United Nations General Assembly resolution 179 (II) of November 21, 1947, WHO officials (including experts)" shall not be legally responsible for words spoken or written and for all acts performed in their official capacity." Furthermore, according to Annex VII of the Convention on the Privileges and Immunities of the Specialized Agencies: "b)...this immunity shall continue notwithstanding that the persons concerned are no longer serving on committees of, or employed on missions for, the Organization."

Formation of the New World Order

5. There is doubt - it was the above-mentioned unlimited rights that encouraged Mr. Tedros Adhanom in his speech "Can we create a pandemic-free world?" at the world government summit in Dubai, February 12, 2018, to state his personal goals. Precisely: a) to seize political rights from all the nations of the world (para.67. : "But I am also taking WHO beyond the technical to the political" b) to impose additional taxes on the citizens of the world for the benefit of WHO and their partners. para.70.: "Governments must walk the talk to ensure a guaranteed level of contingency financing for health emergencies." <https://www.who.int/director-general/speeches/detail/can-we-create-a-pandemic-free-world->

6. To seize political power in the shadow of the COVID-19 pandemic, Mr. Tedros established the Independent Commission on the Prevention of Future Pandemics in May 2020.

Mrs. Ellen Johnson-Sirleaf was appointed as the head of the Panel, who lacked the expertise necessary to bring the pandemic to an end. This claim is supported by the fact that in 2014 when Mrs. Ellen Johnson-Sirleaf was heading Liberia at the time of the Ebola epidemic, the number of victims in the country exceeded that of all other affected countries combined.

In its report (2021), the independent Commission, based on the private interest of its founder, instead of recommending specific options to strengthen the immune system, suggests: "WHO to be given the explicit authority by the World Health Assembly to publish information about outbreaks with pandemic potential on an immediate basis, without requiring the prior approval of national governments" Source p.53.para.2.

https://theindependentpanel.org/wp-content/uploads/2021/05/COVID-19-Make-it-the-Last-Pandemic_final.pdf

7. Because "Fear and hope are the two tools with which people are governed," On January 22, 2020, the WHO Director-General (with the purpose of fear-mongering) convened an Emergency Committee meeting under the 2016 IHR to declare the Wuhan outbreak of December 31, 2019, as a public health emergency of international concern (the highest level of WHO alert). <https://www.who.int/news/item/29-06-2020-covidtimeline>

8. Because on January 22, 2020, there were 571 cases in China = 0.00004% of the population, and the epidemic threshold was 5%, the Committee could not come to an opinion. On January 30, Mr. Tedros reconvened the Committee, this time with the ability (to declare an outbreak as a Public Health Emergency of International Concern (PHEIC). without the participation of Peter Salami since he died on January 24.

<https://www.who.int/news/item/29-06-2020-covidtimeline>

9. Mr. Tedros Adhanom, in a press briefing on COVID-19 - August 13, 2020, personally confirmed the lack of legal and medical basis for declaring an emergency since, on that day, only 9792 infected were reported worldwide is, 0.00006% of the world population and the threshold of epidemic starts at 5%: "At the time, on January 30, there were just 100 cases outside of China and no deaths" Source: para.1.

<https://www.who.int/director-general/speeches/detail/who-director-general-s-opening-remarks-at-the-media-briefing-on-covid-19---13-august-2020>

10. Because the epidemic threshold starts at 5% of cases - and as of January 30, 2020, there were only 100 cases outside of China, which is 0.00005%, to give the appearance of a pandemic - March 2020 in the "international guidelines for certification and classification (coding) of COVID-19 as a cause of death" false instructions were given. This recommendation requires health care providers in 194 countries to list COVID-19 as the cause of death in cases where the laboratory analysis does not show COVID-19 or no laboratory report.

Emergency use ICD codes for COVID-19 disease outbreak

The COVID-19 disease outbreak has been declared a public health emergency of international concern.

- An emergency ICD-10 code of 'U07.1 COVID-19, virus identified' is assigned to a disease diagnosis of COVID-19 confirmed by laboratory testing.
- An emergency ICD-10 code of 'U07.2 COVID-19, virus not identified' is assigned to a clinical or epidemiological diagnosis of COVID-19 where laboratory confirmation is inconclusive or not available.
- Both U07.1 and U07.2 may be used for mortality coding as cause of death. See the International guidelines for certification and classification (coding) of COVID-19 as cause of death following the link below.
- In ICD-11, the code for the confirmed diagnosis of COVID-19 is RA01.0 and the code for the clinical diagnosis (suspected or probable) of COVID-19 is RA01.1.

- [International guidelines for certification and classification \(coding\) of COVID-19 as cause of death pdf, 1.53Mb](#)

This document provides instructions for coding and certification of deaths due to COVID-19. The instructions align with the WHO

11. The WHO document "International Guidelines for the Certification and Classification (Coding) of COVID-19 as a Cause of Death Based on ICD International Statistical Classification of Diseases (March 2020)" (page 8-9) states that "With reference to section 4.2.3 of volume 2 of ICD-10, the purpose of mortality classification (coding) is to produce the most useful cause of death statistics possible. Thus, whether a sequence is listed as 'rejected' or 'accepted' may reflect interests of importance for public health rather than what is acceptable from a purely medical point of view. Therefore, always apply these instructions, whether they can be considered medically correct or not. Individual countries should not correct what is assumed to be an error, since changes at the national level will lead to data that are less comparable to data from other countries, and thus less useful for analysis." <https://www.who.int/standards/classifications/classification-of-diseases/emergency-use-icd-codes-for-covid-19-disease-outbreak>

12. While everyone knows "physical weakness and mental distress certainly contribute to the emergence and spread of disease," and therefore it is necessary to "reduce anxiety and introduce confidence in safety," the WHO director-general, on the contrary, has systematically developed fear and panic about the expected new waves through the media since December 31, 2019.

"The hope of recovery is half of recovery." Voltaire
"Every person who has power tends to abuse it." Montesquieu

13. On February 24, 2020, the WHO demanded \$675 million to fight the pandemic. After the aggravation of the pandemic of fear, on August 13, 2020, Mr. Tedros set different conditions: "Before spending another \$10 trillion US dollars on the consequences of the next wave, we estimate that the world will need to spend at least \$100 billion US dollars on new tools, especially any new vaccines that are developed.." Source: para 33. <https://www.who.int/director-general/speeches/detail/who-director-general-s-opening-remarks-at-the-media-briefing-on-covid-19---13-august-2020>

14. Mr. Tedros, in his November 16, 2020 statement, contradicts his August 13, 2020 statement. Specifically, on August 13, he stated that a vaccine was necessary to protect against COVID-19 and \$100 billion to create a vaccine, and on November 16, he began to contradict himself. "Since the beginning of the pandemic, we knew that a vaccine would be essential for bringing the pandemic under control, which is why WHO proposed the ACT Accelerator. But it's important to emphasise that a vaccine will complement the other tools we have, not replace them. A vaccine on its own will not end the pandemic." Source: para. 23. <https://www.who.int/director-general/speeches/detail/who-director-general-s-opening-remarks-on-the-executive-board-meeting-16-november-2020>

15. The independent Panel, like Mr. Tedros, instead of recommendations to strengthen the immune system, notes: "Vaccination alone will not end this pandemic. It must be combined with testing, contact-tracing, isolation, quarantine, masking, physical distancing, hand hygiene, and effective communication with the public." Source: page.12. para.2. https://theindependentpanel.org/wp-content/uploads/2021/05/COVID-19-Make-it-the-Last-Pandemic_final.pdf

16. Although the WHO Director-General confirmed at the WHO briefing on August 11, 2021, that experience new vaccine in humans had failed: "By contrast, we have several effective vaccines for COVID-19, and yet cases and deaths continue to rise" However, he did not stop this experiments. Source: para. 11. <https://www.who.int/director-general/speeches/detail/who-director-general-s-opening-remarks-at-the-media-briefing-on-covid-19---11-august-2021>

The question arises. If the vaccine protects against new pandemic waves, why has Mr. Tedros increased fear of these new waves? And if it does not protect, why did he not ban the use of these vaccines after admitting on August 11, 2021: "On the contrary, we have many effective vaccines against COVID-19, and yet the number of cases and deaths continues to rise."

17. After a pandemic of fear and panic began to cause a decline in immunity that led to millions of deaths, Dr. Tedros, supported by the Independent Group, began blaming it on the leaders of WHO member countries to cover the tracks.

The Independent Panels Recommendations:

18. page.62.para.2.: “The shelves of storage rooms in the United Nations and Member State capitals are full of the reports of previous reviews and evaluations that could have mitigated the global social and economic crisis in which we find ourselves. They have sat ignored for too long. This time, it must be different. This Panel’s findings are lessons to be learnt, and the recommendations a springboard for action.“

19. Page.3. para.3.: “It has caused a crisis so deep and wide that presidents, prime ministers and heads of international and regional bodies must now urgently accept their responsibility to transform the way in which the world prepares for and responds to global health threats. If not now, then when?“

20. Page.3. para.5: “At the same time, our careful scrutiny of the evidence has revealed failures and gaps in international and national responses that must be corrected.“

https://theindependentpanel.org/wp-content/uploads/2021/05/COVID-19-Make-it-the-Last-Pandemic_final.pdf

21. Mr. Tedros, during his June 8, 2020, press conference on COVID-19, likewise incited the people's discontent with the government and called for protests based on inequality. “WHO fully supports equality and the global movement against racism. We reject discrimination of all kinds. We encourage all those protesting around the world to do so safely“ Source: para.17-18. <https://www.who.int/ru/director-general/speeches/detail/who-director-general-s-opening-remarks-at-the-media-briefing-on-covid-19---8-june-2020>

22. There is no doubt that Mr. Tedros is encouraging nationalism and citizen aggression against governments instead of strengthening the immunity of the global population in the shadow of the COVID-19 pandemic, as evidenced by his repeated references to vaccine nationalism in his COVID-19 briefing remarks: *on October 29, 2020; November 9, 2020; January 5, 2021; January 11, 2021; January 25, 2022; January 26, 2021; January 27, 2021; January 29, 2021; January 31, 2021; February 4, 2021; March 26, 2021; March 31, 2021; April 1, 2021; April 8, 2021; April 9, 2021; June 28, 2021; July 7, 2021; July 30, 2021; August 18, 2021; September 24, 2021.*
<https://www.who.int/>

23. As the citizens do not know that the IHR Regulations 2016 and Articles 21-22 of the WHO Constitution, quarantine measures are mandatory for all WHO member states, for an endless and inconclusive quarantine (violation of human rights and freedoms), they blamed their government and demonstrated against them around the world.

24. The objective of the independent Commission was also to impose additional taxes on the citizens of the G20 (which Mr. Tedros mentioned on February 12): “ countries to commit to providing 60% of the US\$ 19 billion required for OCT-A in 2021 for vaccines, diagnostics, therapeutics and strengthening health systems with the remainder being mobilised from others in the G20 and other higher-income countries. A formula based on ability to pay should be adopted for predictable, sustainable, and equitable financing of such global public goods on an ongoing basis. “ Source: page.12.para.2. https://theindependentpanel.org/wp-content/uploads/2021/05/COVID-19-Make-it-the-Last-Pandemic_final.pdf

25. The proof that Dr. Tedros is not interested in ending the COVID-19 pandemic is as follows:

- "Listings of WHO's response to COVID-19": the latest WHO response to COVID-19 ended on December 15, 2020, during the height of the pandemic. <https://www.who.int/news/item/29-06-2020-covid-timeline>
- According to the decision of the WHO General Assembly on December 1, 2021, the Intergovernmental Negotiating Body (INB) should develop a draft of an international document on pandemic prevention, preparedness, and response and submit it to the 77th World Health Assembly in 2024 for consideration. According to Mr. Tedros' plans, the COVID-19 pandemic (human rights violation - a UN, CoE, and EU crisis) will continue for at least three years. : <https://www.who.int/news/item/01-12-2021-world-health-assembly-agrees-to-launch-process-to-develop-historic-global-accord-on-pandemic-prevention-preparedness-and-response>

There is no doubt that the real objective of the WHO, a non-profit organization, is not "the attainment by all peoples of the highest possible level of health," as stated in Article 1 of the WHO Constitution of June 22, 1946,

but the free flow of gold and currency from one country to another, as stated in the Convention on the Privileges and Immunities of the specialized agencies.

Article III Property, Funds and Assets.

Section 7. Without being restricted by financial controls, regulations or moratoria of any kind :

- (a) The specialized agencies may hold funds, gold or currency of any kind and operate accounts in any currency;
- (b) The specialized agencies may freely transfer their funds, gold or currency from one country to another or within any country and convert any currency held by them into any other currency.

https://treaties.un.org/pages/ViewDetails.aspx?src=IND&mtdsg_no=III-2&chapter=3&clang=_en

Summary:

Probably no one suspected before the pandemic began that without inciting World War III and the capitulation of the entire world, only thanks to the support of health workers, exercising the authority of the Director-General of WHO, exercising the rights guaranteed by Article 21-22 of the WHO Constitution, the IHR and the Convention on the Privileges and Immunities of the Specialized Agencies could establish a new world order.

Namely, to levy taxes on all citizens of the world to be allowed to use national and international transportation, go to educational institutions and workplaces, enter shopping, sports, and entertainment centers, visit churches, synagogues, and mosques, and even walk the streets, forcing them to buy vaccines, masks, PCR tests, and antigens.

Given that the declaration of an "indefinite" Public Health Emergency of International Concern (PHEIC) by the WHO Director-General on January 30, 2020, and the errors in the recommendation to create statistics on infections and deaths from COVID-19 have led to a dictatorship of WHO, a decrease in population immunity, increased disease and death unless the representatives of the WHO member countries at the 75th meeting reverse these draconian measures and re-elect Mr. Tedros and not turn to the International Court of Justice for an expert investigation Mr. Tedros's conspiracy. This will inevitably lead to a stabilization of the WHO dictatorship and, accordingly:

- the disappearance of humane values
- decrease in immunity - increase in morbidity and mortality
- escalation crisis in the UN, the CoE, the EU
- undermining the **sovereignty, security, and economic stability** of many G20 member countries

Very simple:

• If the UN Secretary General's secretariat had paid adequate attention to the Humanistic Outlook Group's December 11, 2018 prediction, there would not have been a WHO crisis.

• If there was no WHO crisis, there would be no UN, CoE and EU crisis.

• If the Humanist Outlook Group's April 11, 2022 prediction were not taken into account, the WHO, UN, CoE and EU crisis would worsen and therefore the sovereignty, security, and economic stability of the G 20 countries will be lost

These documents are attached to this letter.

Your Humanistic Outlook Group (April 11 2022)
